

TABLE OF CONTENTS

Section 1	Introduction.....	1-1
Section 2	Executive Summary	2-1
Section 3	Market and Environmental Legislation Status and Trends	3-1
3.1	Market Conditions	3-1
3.1.1	Regional Changes in Transportation Fuel Demand	3-1
3.1.2	Evolving Propylene Supply and Demand Situation	3-7
3.2	Environmental Legislation and Regulations.....	3-10
3.2.1	Specifications for Transportation Fuels	3-10
3.2.2	Emissions from FCC Units	3-12
3.3	Conclusion	3-13
Section 4	FCC Patent Analysis	4-1
4.1	Global Patent Activities (2008-2014).....	4-2
4.1.1	Annual Global Patent Counts.....	4-2
4.1.2	Patent Counts for Global Regions.....	4-2
4.1.3	Patent Counts for Individual Companies	4-3
4.1.4	Patent Counts for Specific Application Categories	4-5
4.2	Applications Covered by Patents of Specific Companies	4-7
4.2.1	Representation of Patents from Major Companies by Application Groups	4-7
4.2.2	Group 1 Applications – FCC Product Yields and Qualities	4-10
4.2.3	Group 2 Applications – Energy and the Environment	4-12
4.2.4	Group 3 Applications – FCC Alternative Feed Sources	4-14
4.2.5	Group 4 Applications – FCC Catalysts and Additives	4-16
4.2.6	Group 5 Applications – FCC Operations.....	4-17
4.3	Summary and Discussion	4-19
Section 5	Patent Technology Themes.....	5-1
5.1	Group 1 Applications – FCC Product Yields and Qualities.....	5-1
5.1.1	Gasoline Yield	5-1
5.1.1.1	Process.....	5-1
5.1.1.2	Catalysts.....	5-2
5.1.2	Gasoline Reformulation	5-3
5.1.2.1	Process.....	5-3
5.1.2.2	Catalyst	5-6
5.1.3	LCO Yield and Quality	5-8
5.1.3.1	Process.....	5-8
5.1.3.2	Catalyst	5-9
5.1.4	Light Olefins Yield	5-10
5.1.4.1	Process and/or Hardware.....	5-10
5.1.4.2	Catalysts and Additives.....	5-17
5.2	Group 2 Applications – Energy and the Environment.....	5-22
5.2.1	Energy Management	5-22
5.2.2	GHG Emissions	5-24
5.2.3	SNO _x Emissions	5-26

5.3	Group 3 Applications – FCC Alternative Feeds.....	5-33
5.3.1	Resid Processing.....	5-34
5.3.2	Biofeeds.....	5-39
5.3.3	Paraffinic Hydrocarbons.....	5-43
5.4	Group 4 Applications – FCC Catalysts and Additives.....	5-43
5.4.1	Catalyst Formulation/Preparation.....	5-43
5.4.2	Additives.....	5-46
5.5	Group 5 Applications – FCC Operations.....	5-47
5.5.1	Catalyst Management/Addition.....	5-47
5.5.2	Feed Injection.....	5-49
5.5.3	Catalyst Separation/Stripping.....	5-50
5.5.4	Catalyst Regeneration/Cooling.....	5-53
5.5.5	Product Fractionation/Recovery.....	5-57
5.5.6	Process Control.....	5-57
5.6	Summary and Discussion.....	5-59
Section 6	Gap Analysis to Identify Technical Challenges & Business Opportunities.....	6-1
6.1	Volatile Oil Prices and Shift in Crude Supply and Demand Fundamentals.....	6-2
6.1.1	Processing Heavy, Aromatic Crudes.....	6-5
6.1.1.1	Current Technology Status.....	6-10
6.1.1.1.1	Commercial RFCC Processes.....	6-12
6.1.1.1.2	Commercial RFCC Catalysts.....	6-14
6.1.1.2	R&D Works to Capture Future Business Opportunities.....	6-19
6.1.2	Processing Paraffinic, Contaminant-laden Tight Oil.....	6-21
6.1.2.1	FCC Metal Contaminants and Product Quality.....	6-21
6.1.2.1.1	Current Technology Status.....	6-22
6.1.2.1.2	R&D Works to Capture Future Business Opportunities.....	6-24
6.1.2.2	Maintaining FCC Heat Balance.....	6-25
6.1.2.2.1	Current Technology Status.....	6-25
6.1.2.2.2	R&D Works to Capture Future Business Opportunities.....	6-27
6.1.2.3	Lack of VGO Feedstocks.....	6-28
6.1.2.3.1	Current Technology Status.....	6-29
6.1.2.3.2	R&D Works to Capture Future Business Opportunities.....	6-29
6.1.2.4	Improving Octane Quality.....	6-30
6.1.2.4.1	Current Technology Status.....	6-30
6.1.2.4.2	R&D Works to Capture Future Business Opportunities.....	6-31
6.1.3	Processing Dumbbell Crudes.....	6-31
6.1.3.1	Current Technology Status.....	6-32
6.1.3.2	R&D Works to Capture Future Business Opportunities.....	6-32
6.1.4	Processing Waxy Feeds.....	6-33
6.1.4.1	Current Technology Status.....	6-34
6.1.4.2	R&D Works to Capture Future Business Opportunities.....	6-35
6.2	Processing Biofeeds in FCCUs.....	6-36
6.2.1	Current Technology Status.....	6-37
6.2.2	R&D Works to Capture Future Business Opportunities.....	6-39
6.3	Changes to Product Demand and Fuel Specifications.....	6-41
6.3.1	Global Gasoline and Diesel Imbalance.....	6-41
6.3.1.1	Maximize LCO Yield.....	6-46
6.3.1.1.1	Current Technology Status.....	6-47
6.3.1.1.2	R&D Works to Capture Future Business Opportunities.....	6-52

6.3.1.2	Improving the Quality of LCO Coming from the FCCU	6-54
6.3.1.2.1	Current Technology Status	6-55
6.3.1.2.2	R&D Works to Capture Future Business Opportunities	6-56
6.3.1.3	Flexibly Changing the Proportions of FCC Products	6-56
6.3.1.3.1	Current Technology Status	6-57
6.3.1.3.2	R&D Works to Capture Future Business Opportunities	6-59
6.3.2	Increasingly Stringent Gasoline Standards	6-60
6.3.2.1	Gasoline Sulfur Reduction	6-61
6.3.2.1.1	Current Technology Status	6-61
6.3.2.1.2	R&D Works to Capture Future Business Opportunities	6-63
6.3.2.2	Gasoline Benzene Reduction	6-65
6.3.2.2.1	Current Technology Status	6-65
6.3.2.2.2	R&D Works to Capture Future Business Opportunities	6-66
6.3.3	Surplus of Naphtha	6-66
6.3.3.1	Sending Naphtha to Second Riser	6-69
6.3.3.1.1	Current Technology Status	6-69
6.3.3.1.2	R&D Works to Capture Future Business Opportunities	6-69
6.3.3.2	Oligomerization of Light Naphtha	6-70
6.3.3.2.1	Current Technology Status	6-70
6.3.3.2.2	R&D Works to Capture Future Business Opportunities	6-73
6.3.3.3	Alkylation of Heavy Naphtha and Aromatics	6-77
6.3.3.3.1	Current Technology Status	6-77
6.3.3.3.2	R&D Works to Capture Future Business Opportunities	6-78
6.3.4	Increasing Demand for Propylene	6-78
6.3.4.1	Current Technology Status	6-80
6.3.4.2	R&D Works to Capture Future Business Opportunities	6-87
6.3.5	Increasing Demand for Butylenes	6-91
6.3.5.1	Current Technology Status	6-92
6.3.5.2	R&D Works to Capture Future Business Opportunities	6-93
6.3.6	Increasing Demand for BTX	6-94
6.3.6.1	Current Technology Status	6-96
6.3.6.2	R&D Works to Capture Future Business Opportunities	6-97
6.3.7	Reducing Residual Fuel Oil Demand	6-98
6.3.7.1	Current Technology Status	6-98
6.3.7.2	R&D Works to Capture Future Business Opportunities	6-100
6.4	Unit Design Advances to Improve Operational Efficiency for Higher Profitability	6-102
6.4.1	Catalyst Management	6-102
6.4.1.1	Catalyst/Additive Addition	6-102
6.4.1.1.1	Current Technology Status	6-103
6.4.1.1.2	R&D Works to Capture Future Business Opportunities	6-103
6.4.1.2	Catalyst Rejuvenation	6-104
6.4.1.2.1	Current Technology Status	6-104
6.4.1.2.2	R&D Works to Capture Future Business Opportunities	6-105
6.4.1.3	Controlling Catalyst Activity and Selectivity	6-106
6.4.1.3.1	Current Technology Status	6-106
6.4.1.3.2	R&D Works to Capture Future Business Opportunities	6-109
6.4.2	Feed Injection	6-109
6.4.2.1	Current Technology Status	6-109
6.4.2.2	R&D Works to Capture Future Business Opportunities	6-111
6.4.3	Catalyst Separation/Stripping	6-113
6.4.3.1	Current Technology Status	6-113
6.4.3.2	R&D Works to Capture Future Business Opportunities	6-116

6.4.4	Catalyst Regeneration/Cooling	6-119
6.4.4.1	Current Technology Status	6-119
6.4.4.2	R&D Works to Capture Future Business Opportunities	6-121
6.4.5	Product Fractionation/Recovery	6-124
6.4.5.1	Current Technology Status	6-125
6.4.5.2	R&D Works to Capture Future Business Opportunities	6-127
6.4.6	Process Control and Simulation	6-127
6.4.6.1	Current Technology Status	6-127
6.4.6.2	R&D Works to Capture Future Business Opportunities	6-130
6.5	Improving Energy Efficiency and Reducing CO₂ Emissions	6-131
6.5.1	Energy Management	6-131
6.5.1.1	Current Technology Status	6-133
6.5.1.2	R&D Works to Capture Future Business Opportunities	6-136
6.5.2	Carbon Capture	6-137
6.5.2.1	Current Technology Status	6-137
6.5.2.2	R&D Works to Capture Future Business Opportunities	6-140
6.6	Increasingly Stringent Emissions Standards.....	6-143
6.6.1	SO _x Emissions Reduction	6-144
6.6.1.1	Current Technology Status	6-144
6.6.1.2	R&D Work to Capture Future Business Opportunities	6-146
6.6.2	NO _x Emissions Reduction	6-147
6.6.2.1	Current Technology Status	6-147
6.6.2.2	R&D Works to Capture Future Business Opportunities	6-148
6.6.3	PM Emissions Reduction	6-150
6.6.3.1	Current Technology Status	6-150
6.6.3.2	R&D Works to Capture Future Business Opportunities	6-151
6.7	Rising Catalyst Manufacturing Costs	6-151
6.7.1	Use of Rare Earths	6-151
6.7.1.1	Current Technology Status	6-153
6.7.1.2	R&D Works to Capture Future Business Opportunities	6-154
6.7.2	Improved Catalyst and Additive Manufacturing Efficiency.....	6-154
6.7.2.1	Current Technology Status	6-154
6.7.2.2	R&D Works to Capture Future Business Opportunities	6-156
6.8	Conclusion.....	6-160
Section 7	<i>SWOT Analysis of FCC Technology.....</i>	<i>7-1</i>
7.1	Strengths.....	7-2
7.2	Weaknesses	7-6
7.3	Opportunities.....	7-9
7.4	Threats.....	7-13
7.5	Conclusion.....	7-28
Section 8	<i>Predicting Technology Trends and identifying R&D Opportunities</i>	<i>8-1</i>
8.1	Focuses of Significant Patents (from 2000 to 2014)	8-2
8.1.1	Resid and Heavy Oil Processing.....	8-2
8.1.1.1	Process and Hardware.....	8-3
8.1.1.2	Catalysts and Additives.....	8-14

8.1.2	Biofeeds and Fischer-Tropsch Feeds	8-27
8.1.2.1	Biofeeds.....	8-28
8.1.2.1.1	Process and Hardware.....	8-28
8.1.2.1.2	Catalysts	8-32
8.1.2.2	Fischer-Tropsch Feeds.....	8-33
8.1.3	Gasoline Yield and Quality	8-33
8.1.3.1	Gasoline Yield	8-33
8.1.3.1.1	Process and Hardware.....	8-37
8.1.3.1.2	Catalysts and Additives.....	8-39
8.1.3.2	Octane Quality	8-41
8.1.3.2.1	Process and Hardware.....	8-43
8.1.3.2.2	Catalysts and Additives.....	8-46
8.1.3.2.2.1	Catalysts	8-47
8.1.4	Gasoline Reformulation	8-49
8.1.4.1	Gasoline Sulfur Reduction	8-49
8.1.4.1.1	Process and Hardware.....	8-50
8.1.4.1.2	Catalysts and Additives.....	8-53
8.1.4.2	Gasoline Olefins Reduction	8-61
8.1.4.2.1	Process and Hardware.....	8-61
8.1.4.2.2	Catalysts	8-64
8.1.5	Light Olefins Yield	8-66
8.1.5.1	Process and Hardware	8-67
8.1.5.2	Catalysts and Additives	8-79
8.1.6	LCO Yield and Quality	8-91
8.1.6.1	Improving LCO Yield	8-91
8.1.6.1.1	Process and Hardware.....	8-92
8.1.6.1.2	Catalysts and Additives.....	8-94
8.1.6.2	Improving LCO Quality	8-98
8.1.6.2.1	Process and Hardware.....	8-98
8.1.6.2.2	Catalyst and Additives	8-99
8.1.7	FCC Operations	8-100
8.1.7.1	Catalyst Management/Addition.....	8-100
8.1.7.2	Feed Injection.....	8-105
8.1.7.3	Catalyst Separation and Disengagement	8-106
8.1.7.4	Catalyst Stripping	8-109
8.1.7.5	Catalyst Regeneration/Cooling	8-110
8.1.7.6	Process Monitor, Control, and Simulation	8-114
8.1.8	Energy Management and CO ₂ Emissions.....	8-116
8.1.8.1	Energy Management	8-116
8.1.8.2	GHG Emissions Reduction	8-120
8.1.9	SO _x , NO _x , and PM Emissions.....	8-123
8.1.9.1	Process and Hardware	8-123
8.1.9.2	Catalysts and Additives	8-129
8.1.9.2.1	SO _x Emissions Reduction	8-133
8.1.9.2.2	NO _x Emissions Reduction	8-136
8.1.9.2.3	Combined SO _x and NO _x Emissions Reduction	8-140
8.1.9.2.4	CO Promoters with or without NO _x Removal.....	8-141
8.1.9.2.5	PM Emissions Reduction	8-143
8.1.10	Catalyst Manufacturing.....	8-147
8.1.10.1	Efficient Manufacturing to Lower Production Costs.....	8-147
8.1.10.2	Methods of Preparing Improved Catalysts and Additives.....	8-148
8.1.10.3	Analysis and Testing of Catalysts	8-151

8.2	Analysis of Patenting Trends, and Predictions.....	8-152
8.2.1	Processes and Hardware (5 predictions).....	8-152
8.2.2	Catalysts and Additives (5 predictions).....	8-157
8.3	Conclusion.....	8-163
Section 9	<i>Strategic Analysis and Recommendations.....</i>	9-1
9.1	Recommendations for Global Refiners Operating FCC Units (15 recommendations)	9-2
9.2	Recommendations for FCC Technology Providers (15 recommendations)	9-26
9.3	Conclusion.....	9-65
Section 10	<i>References</i>	10-1
Section 11	<i>Index.....</i>	11-1
11.1	Company/Institution	11-1
11.2	Subject	11-6
Section 12	<i>Appendix: List of Patents (2000-2014).....</i>	12-1

LIST OF TABLES

Table	Title	Page
2-1	Worldwide Fuel Specifications	2-5
2-2	FCCU Regenerator Emission Targets	2-6
2-3	Internal and External Factors Facing FCC Units in Future Refinery Operations	2-10
3.1-1	Global Slurry Oil Consumption, 2008	3-5
3.1-2	Worldwide Installed Steam Cracking Capacity in 2013	3-9
3.2-1	Worldwide Fuel Specifications	3-12
3.2-2	IMO Bunker Fuel Sulfur Limits	3-12
3.2-3	FCCU Regenerator Emission Targets	3-13
4.2-1	Application Directions for FCC Patents from Major Companies	4-9
6.1-1	US Crude Imports by Country of Origin 2005-2014	6-4
6.1-2	2014 US Refinery Coking Capacity by Refinery Region	6-7
6.1-3	N ₂ Distribution in FCC Products from Processing Various Feeds	6-11
6.1-4	Summary of Commercially Available RFCC Processes	6-12
6.1-5	Summary of Commercially Available RFCC Catalysts and Additives	6-15
6.1-6	Summary of Common Contaminant Metals in Tight Oil and Potential Processing Problems	6-22
6.1-7	FCC Catalysts and Additives Applicable for Tight Oil Processing	6-23
6.1-8	Operational and Hardware Adjustments for Maintaining FCC Heat Balance	6-26
6.1-9	Options Available to Maintain FCC Heat Balance when Processing Tight Oil and Potential Concerns	6-26
6.1-10	Fractions of Waxy Crudes Compared to Other Sources	6-34
6.2-1	Summary of Biofeeds Potentially Useful for FCC	6-37
6.2-2	Summary of Renewable FCC Technologies	6-39
6.3-1	US Refined Product Exports, 2005-2014	6-42
6.3-2	Shift in Gasoline-to-Diesel Demand Ratio by Region	6-44
6.3-3	Global Trades of Light Distillates (Gasoline & Naphtha)	6-45
6.3-4	Global Trades of Middle Distillates (Gasoil & Kerosene)	6-46
6.3-5	Impact of Operation on LCO Production	6-49
6.3-6	Summary of Various Process and Catalyst Technologies that Maximize FCC LCO Production	6-50
6.3-7	Summary of Various Catalyst Technologies that Maximize FCC LCO Production	6-51
6.3-8	Worldwide Diesel Specifications	6-55
6.3-9	Worldwide Gasoline Specifications	6-60
6.3-10	Benzene Concentration in Gasoline vs. Propylene Modes of Operation	6-65
6.3-11	Comparison of Properties of Tight Oil and Other Global Crudes	6-68
6.3-12	Incremental Enhancement Augmentation of Diesel Production	6-72
6.3-13	Olefin Oligomerization Catalyst Patents	6-75
6.3-14	Olefin Oligomerization Process Patents	6-76
6.3-15	Aromatics Alkylation Process Patents	6-78
6.3-16	Impact of Design Adjustments on FCCU in High Olefin Mode	6-82
6.3-17	Options to Enhance Propylene Yield from FCC	6-83
6.3-18	Summary of Commercially Available Processes for Maximizing Light Olefins	6-83
6.3-19	Summary of Commercially Available FCCU Catalysts and Additives for Olefin Production	6-86
6.3-20	Applications for FCC Slurry Oil	6-99

Table	Title	Page
6.4-1	Summary of Commercially Available FCC Feed nozzles	6-110
6.4-2	Summary of Commercial Separators and Disengagers Offered by Licensors	6-114
6.4-3	Summary of Commercial Strippers Offered by Licensors	6-115
6.4-4	Regenerator Configuration Options	6-120
6.4-5	Differences Between Partial and Full Regeneration Modes	6-120
6.4-6	Summary of Commercial FCC Regenerators Offered by Licensors	6-121
6.4-7	FCC Gas Plant Revamp Opportunities	6-126
6.4-8	Summary of Commercially Available Advanced Control Systems	6-127
6.4-9	Summary of Commercially Available FCC Process Modeling and Simulation Systems	6-129
6.5-1	Sources of Inefficiency in Fluid Catalytic Cracking	6-132
6.5-2	Summary of Technology Options for Improving FCCU Energy Efficiency	6-134
6.5-3	Most-likely FCC Unit Capture Method	6-139
6.5-4	Summary of Ongoing CCU Projects Worldwide	6-142
6.6-1	FCCU Regenerator Emissions Targets	6-143
6.6-2	Hardware Options for Emissions Reduction	6-144
6.6-3	Effect of Operational Variables on FCC SO _x Emissions	6-145
6.6-4	Summary of SO _x Reducing Catalysts and Additives	6-145
6.6-5	Summary of NO _x Reducing Catalysts and Additives	6-148
6.7-1	Effect of Rare Earth Content and Prices on Overall FCC Catalyst Costs	6-153
6.7-2	Low Rare-Earth FCC Catalyst Offerings	6-154
6.8-1	Summary of FCC Patent Gap Analysis	6-160
7-1	Internal and External Factors Facing FCC Units in Future Refinery Operations	7-1
7.1-1	US Gasoline Blending Pool Components Properties	7-3
7.1-2	Estimated Utility Consumption and Capital Costs for FCC vs. Hydrocracker	7-5
7.1-3	Average Energy Consumption for US Refinery FCCUs and Hydrocrackers, 2005	7-5
7.2-1	FCC LCO Quality vs. EU and North American Diesel Specs	7-7
7.2-2	Steam Cracker Product Yields Based on Feedstock	7-7
7.2-3	Average CO ₂ Emissions from Sources within a 250K-b/d US Refinery	7-9
7.4-1	Biofuels Demand Growth by Region, 2013-2018	7-24
8.1-1	Current Process and Hardware Solutions to Crack Resid and Heavy Oil	8-3
8.1-2	A Comparison of Current FCC Process and Hardware Solutions to Produce Gasoline	8-34
8.1-3	A Comparison of Current FCC Catalyst and Additive Solutions to Produce Gasoline	8-39
8.1-4	A Comparison of Current FCC Process Solutions to Increase Gasoline octane	8-42
8.1-5	A Comparison of Current FCC Catalyst and Additive Solutions to Increase Gasoline Octane	8-46
8.1-6	A Comparison of Current FCC Catalyst and Additive Solutions to Lower FCC Gasoline Sulfur	8-54
8.1-7	A Comparison of Current FCC Process and Hardware Solutions to Lower FCC Gasoline Olefins Content	8-61
8.1-8	A Comparison of Current FCC Catalyst and Additive Solutions to Lower FCC Gasoline Olefins Content	8-64
8.1-9	A Comparison of Current and Potential Process and Hardware Solutions to Produce Propylene	8-67
8.1-10	A Comparison of Current FCC Process Solutions to Produce LCO	8-92
8.1-11	A Comparison of Current FCC Catalyst and Additive Solutions to Produce LCO	8-95
8.1-12	Improvements In FCC Productivity and Energy Efficiency	8-117
8.1-13	Potential Methods to Reduce FCCU CO ₂ Emissions	8-120
8.1-14	A Comparison of Current Process and Hardware Solutions to Reduce FCC Emissions	8-123
8.1-15	A Comparison of Current and Potential Catalyst and Additive Solutions to Reduce Emissions	8-130

Table	Title	Page
9.1-1	Market and Environmental Challenges Facing FCC Refineries in Various Global Regions	9-3
9.1-2	US Refinery Coking Capacity and FCC Capacity Capable of Processing Light Tight Oil, 2014	9-7
9.1-3	Effect of FCCU Modifications on Key Gasoline Reformulation Targets	9-8
9.1-4	SWOT Analysis for Global Refiners Operating FCC Units	9-26
9.2-1	Catalysts and Additives Offered by Major FCC Catalyst Suppliers	9-32
9.2-2	Summary of Commercially Available FCC Catalysts	9-33
9.2-3	Summary of Commercially Available FCC Additives	9-34
9.2-4	Processes, Hardware, and Internals Offered by Major FCC Technology Suppliers	9-36
9.2-5	Processes Technologies Offered by Major Refining Technology Suppliers	9-37
9.2-6	SWOT Analysis for FCC Technology Providers	9-64

LIST OF FIGURES

Figure	Title	Page
2-1	Regional Light Distillates Consumption, 2010-2014	2-2
2-2	Regional Middle Distillates Consumption, 2010-2014	2-2
2-3	Regional Light vs. Middle Distillates Consumption Ratio, 2005-2014	2-3
2-4	Regional Fuel Oil Consumption, 2005-2014	2-4
2-5	A FCC Perpetual Profit Cycle	2-12
2-6	Interworking of Patent, GAP, and SWOT Analysis to Help Future FCC Operations	2-12
3.1-1	Regional Light Distillates Consumption, 2010-2014	3-2
3.1-2	Regional Middle Distillates Consumption, 2010-2014	3-2
3.1-3	Regional Light vs. Middle Distillates Consumption Ratio, 2005-2014	3-3
3.1-4	Regional Fuel Oil Consumption, 2005-2014	3-6
3.1-5	Product Yields from Various Steam Cracker Feedstocks, wt%	3-8
4.1-1	Annual Global Counts of Issued FCC Patents, 2008-2014	4-2
4.1-2	Regional Counts of Issued FCC Patents, 2008-2014	4-3
4.1-3	Company Counts of Issued FCC Patents, 2008-2014	4-4
4.1-4	Applications for 2008-2014 Issue Dates	4-6
4.1-5	Categorical Distributions of Catalyst and Additive Patents, 2008-2014 Issue Dates	4-7
4.2-1	Distributions of Patents from Major Companies across the Applications Groups	4-8
4.2-2	Company Patent Counts for Group 1 Applications with Issue Dates during 2008-2014	4-10
4.2-3	Company Distributions of Patent Coverage over Group 1 Application Categories, Issue Dates 2008-2014	4-11
4.2-4	Company Patent Counts for Group 2 Applications with Issue Dates during 2008-2014	4-12
4.2-5	Company Distributions of Patent Coverage over Group 2 Application Categories, Issue Dates 2008-2014	4-13
4.2-6	Company Patent Counts for Group 3 Applications with Issue Dates during 2008-2014	4-14
4.2-7	Company Distributions of Patent Coverage between Group 3 Application Categories, Issue Dates 2008-2014	4-15
4.2-8	Company Patent Counts for Group 4 Applications with Issue Dates during 2008-2014	4-16
4.2-9	Company Distributions of Patent Coverage between Group 4 Application Categories, Issue Dates 2008-2014	4-17
4.2-10	Company Patent Counts for Group 5 Applications with Issue Dates during 2008-2014	4-18
4.2-11	Company Distributions of Patent Coverage Among Group 5 Application Categories, Issue Dates 2008-2014	4-19
6-1	Factors Influencing FCC Technological Advancements	6-2
6.1-1	Worldwide Crude API Gravity Projections, 2010-2035	6-6
6.1-2	Worldwide Crude Sulfur Content Projections, 2010-2035	6-6
6.3-1	Effects of FCC Catalyst Formulation on Reactions, Product Mix	6-51
6.3-2	Foster Wheeler's Zero Gasoline Refinery	6-71
6.3-3	Method for Producing Diesel from FCC Naphtha and Olefins	6-71
6.3-4	Potential Routes for Converting Naphtha to Diesel	6-73
7.5-1	Turning Threats into Opportunities for FCC Technology	7-29
9-1	An FCC Perpetual Profit Cycle	9-1
9-2	Interworking of Patent, GAP, and SWOT Analysis to Help Future FCC Operations	9-2
9.1-1	US Refinery Major Process Upsets, 2010-2014	9-20
9.1-2	Causes of FCCU Upsets at US Refineries, 2010-2014	9-21
9.1-3	Failed Hardware/Equipment Causing FCCU Upsets at US Refineries, 2010-2014	9-22
9.1-4	Effects of FCCU Upsets at US Refineries, 2010-2014	9-23
9.1-5	Net Profit Loss due to Unplanned FCC Shutdown	9-24

Figure	Title	Page
9.2-1	Distribution of Patents from Major Companies across Application Groups, 2008-2014	9-51
9.2-2	UOP Patents by FCC Application, 2008-2014	9-52
9.2-3	Sinopec Patents by FCC Application, 2008-2014	9-52
9.2-4	Grace Patents by FCC Application, 2008-2014	9-53
9.2-5	ExxonMobil Patents by FCC Application, 2008-2014	9-53
9.2-6	Albemarle Patents by FCC Application, 2008-2014	9-54
9.2-7	Petrobras Patents by FCC Application, 2008-2014	9-54
9.2-8	Saudi Aramco Patents by FCC Application, 2008-2014	9-55
9.2-9	BASF Patents by FCC Application, 2008-2014	9-55
9.2-10	INTERCAT _{JM} Patents by FCC Application, 2008-2014	9-56
9.2-11	Shell Patents by FCC Application, 2008-2014	9-56
9.2-12	Major Patent Holders (Refiners), 2008-2014	9-57
9.2-13	Major Patent Holders (Catalyst Suppliers), 2008-2014	9-58
9.2-14	Major Patent Holders (Process Developers), 2008-2014	9-58
9.2-15	Licensing Companies FCC Completed Projects, 1998-2014	9-60
9.2-16	Licensing Companies FCC Future Projects, 2015 and beyond	9-61
9.2-17	FCC Completed and Future Projects, 1998 and beyond	9-62
9.2-18	Licenser Market Share of FCC Completed and Future Projects, 1998 and beyond	9-63
